

EVOLUTION by HARO®

A fresh take on WC seat design

EVOLUTION – enhanced development of an industry leading SoftClose® product is an apt description for this new Award Winning series of toilet seats. Our market leading SoftClose® technology has been re-dimensioned for the EVOLUTION series to create an unprecedented, flat design which still offers the highest comfort, practicality and reliability.

The EVO model is the epitome of playful simplicity. Ultra purist and elegant this is a timeless toilet seat for lovers of aesthetics and as with all models in the series offers maximum seating comfort.

A dynamic and distinctive look adds an element of surprise to the ERA model. Clear surfaces and precisely drawn lines characterise this reinvention of the classic design.

Both models have already been awarded with the coveted red dot design award as well as with the PlusX award in the categories "Design" and "High Quality".

The series is perfectly complemented by the third model EOX. This modern D-Shape fascinates by its extremely low profile showing character and leaving a lasting impression with its striking linearity.

Despite the reduced forms the EVOLUTION series features our SoftClose® system and our patented TakeOff® hinge allowing removal in one simple action for easy cleaning.

Hamberger Sanitary GmbH based in Rohrdorf near Rosenheim is now the largest manufacturer of toilet seats in Europe. Hamberger has been manufacturing toilet seats since 1912. The fact that the company develops its own designs, uses its own established hinge technology and operates a global logistics network forms the basis for its success. The company was established back in 1866 and is now managed in the fourth and fifth generation by Peter Hamberger and his son Dr Peter Hamberger. The company has constantly acquired new shares of the market and is now the largest manufacturer of duroplast toilet seats anywhere in the world. Around 50% of its products are exported to more than 50 different countries throughout the world. Further information is available at www.hamberger-sanitary.com
